/me/about

Sergej Veliseicik (28)

Vilnius, Lithuania

Full-Stack developer

s.veliseicik@gmail.com

Coding is my life since school. I consider myself as a senior full-stack developer. Main stack I prefer is Symfony+ReactJS, but I also know other stacks and technologies. I used to work by myself and in corporations. I know how things work under the hood and I know how to technically lead products from zero to production.

I'm Looking for CTO/Tech lead position in long-term company/project with challenges and ability to improve my skills even more.
